

MultiRIP

What are the Easy Dye Sub and Easy Transfer Printers?

There are three main printers that you will use with MultiRIP. The MultiRIP Stylus Pro x800 is the primary printer that gives you entire access to all the RIP settings. MultiRIP has also included an Easy DyeSub and Easy Transfer printers as well. These printers have pre-set settings that make it easier to print inkjet and sublimation transfers on to their respective fabrics. Below are the pre-set settings. You will still need to make changes to some items like Page Size.

Easy DyeSub Print Settings:

- Ink Type – Dye Sublimation Ink
- Media Type – Polyester (Photo)
- Resolution – Enhanced (720 x 720 dpi)
- Mirror Image – Yes
- Print Direction – Bi-Directional
- Screening – Stochastic

Easy Transfer Print Settings:

- Ink Type – MultINK™
- Media Type – Transfer (Photo)
- Resolution – Enhanced (720 x 720 dpi)
- Mirror Image – Yes
- Print Direction – Bi-Directional
- Screening – Stochastic
