

MultiRIP

All My Validations are Gone, Can I Get More?

Both the MultiRIP Hybrid and MultiRIP GP software products come with three Validation / Activation Codes for each Product Code you purchase. We strongly recommend validating the software on only one computer (or two computers if absolutely necessary) and keep the remaining Validation Code(s) if something happens to your computer.

In an effort to preserve your Validation Codes, you also have the ability to remove your existing Validation Code from your computer and it will be added back into the online account that is associated with your Product Code. This will allow you to move the validation from one computer to another or save a validation if you plan on reformatting the hard drive on your computer. Here are the instructions to removing your existing Validation Code:

How can I remove the validation from one computer and put it on another computer or put it back into my account? These steps are also used before reformatting a computer's hard drive.

It is possible to upgrade the version of MultiRIP software without losing your existing validation if you follow the steps below:

How can I properly uninstall the MultiRIP on my computer to update it with the latest version? Also used when updates on your computer firmware lead to error messages in MultiRIP.

If you land up using all three of your Validation Codes, then you will be able to purchase two (2) additional Validation Codes for the price of \$200.00. (Price subjected to change without notice). For additional information about purchasing additional Validation Codes, please send an email to support@multirip.com.

For additional technical support information, please visit the Frequently Asked Questions page (www.multirip.com/faq.html) or contact your Distributor.
